Peter Berrill - Curriculum Vitae

PERSONAL AND CONTACT DETAILS

Address:	Schloss Str. 65, Berlin 14059, Germany
Nationality:	Irish
Date of Birth:	18 May 1989
Phone:	+49 178 736 2333
E-mail:	peter.berrill@aya.yale.edu ; peter.berrill@tu-berlin.de
Website:	peterberr.github.io

EDUCATION

2016 - 2021	Doctor of Philosophy in Industrial Ecology – Yale University (USA).
	Thesis: "A Comparison of Strategies for Mitigation of Lifecycle Greenhouse Gases
	from Residential Buildings in The United States". Supervisor Edgar G. Hertwich
2013 - 2015	Master of Science in Industrial Ecology – Double degree awarded by University of
	Graz (Austria) & TU Delft/Leiden University (Netherlands).
2014 - 2015	Master of Science – Waseda University (Japan), study exchange
2015	Master of Science – NTNU Industrial Ecology (Norway), research exchange
2009 - 2013	Bachelor of Engineering in Energy Systems Engineering, with minor in Civil
	Engineering – National University of Ireland, Galway (Ireland). Result: 1.1
2008 - 2009	Higher Certificate in Music Performance – Royal Conservatoire of Scotland (UK)

ACADEMIC PROFESSIONAL EXPERIENCE

2021-Present	Marie-Curie Individual Fellowship project lead, TU Berlin (DE). 'Sustainable
	Urban Form For Integrated Climate Change Solutions', modelling influence of
	urban form on service levels, energy and emissions from buildings and transport.
2020	Visiting researcher, Residential Buildings Research Group, NREL (USA).
	Enhancing the modelling of multifamily buildings in the ResStock model.
2016-2021	Researcher and Doctoral Candidate, Yale University School of Environment
	(USA). Primary focus on modelling of past and future energy and GHG emissions
	from US residential sector. Additional research on multigeneration district energy
	systems, and role of capital in environmental impacts of consumption.
2015	Researcher, Industrial Ecology Programme NTNU (Norway). Life cycle
	assessment of electricity supply scenarios for Europe.

RESEARCH HIGHLIGHTS (top 3 most impactful research outputs)

Berrill, P., E.J.H Wilson, J.L. Reyna, A.D. Fontanini and E.G. Hertwich. 2022. Decarbonization pathways for the residential sector in the United States, 2020-2060. *Nature Climate Change* 12(8): 712-718
Uish manufacture and datailed analysis of an annual and a distribution of an annual and a distribution.

- High-resolution and detailed analysis of energy and embodied GHG emissions in 108 scenarios of residential decarbonisation, considering housing stock growth, renovation and electrification and grid decarbonisation. Featured as a research highlight in 'News and Views' column of NCC issue of publication.

Berrill, P., K.T. Gillingham and E.G. Hertwich. 2021. Influence of housing policy and housing typology on residential energy demand in the United States. *Environmental Science & Technology* 55(4): 2224-2233 *Retrospective analysis of federal government housing policies on housing typology mix in new construction over six decades, and knock-on effects for current urban residential energy demand. Runner up prize in EST 2021 best paper awards. Extensive coverage on twitter, and news piece written by Rocky Mountain Institute*

- Berrill, P., A. Arvesen, Y. Scholz, H.C. Gils, and E.G. Hertwich. 2016. Environmental impacts of high penetration renewable energy scenarios for Europe. *Environmental Research Letters* 10(12): 123002.
- Life cycle assessment of high renewable electricity supply scenarios for Europe, including impacts of energy storage and transmission grid infrastructure. Demonstrates land and metal requirements, and reduced environmental impacts for high renewable electricity supply. Research highlight in Nature Climate Change

RESEARCH MENTORING EXPERIENCE

2023	Research mentor to two early-stage doctoral students on high-resolution mapping of building materials stocks
2023	Main research mentor to visiting PhD student on assessing implications of constrained supply of materials needed for energy transition
2023	Research mentor to visiting master student for cleaning and harmonising GIS and energy data in French buildings
2022	Research mentor to master student for MSc dissertation "Enhancing the sustainability of the residential sector with sufficiency measures"
2020	Research mentor to high-school student with Lumiere Education
2020	Research mentor to two masters students for summer internship research projects: "US economy-wide non-hazardous waste generation: an extension the us Input-Output tables", and "Comparison of physical vs economic allocation for airline GHG emissions" (resulting in a journal publication)
2017	Research mentor to masters student for thesis research project: "Assessment of the Embodied and Operational Trade-offs of a U.S. Multi-Family Building With Changing Energy Codes and Different Climate Zones"

ACADEMIC TEACHING EXPERIENCE: (Teaching Assistant Role)

2022	Urban Economics for Sustainability (Seminar), with Prof. Felix Creutzig
2020	Industrial Ecology, with Prof. Marian Chertow and Dr. Stijn van Ewijk
2019	Energy Systems Analysis, with Prof. Narasimha Rao
2019, 2017	Green Building: Issues and Perspectives, with Mr. Peter Yost
2018	Energy Systems Analysis, with Prof. Edgar Hertwich
2017	Carbon Footprints: Modelling and Analysis, with Prof. Edgar Hertwich

GRANTS AND AWARDS

April 2021	Marie Skłodowska-Curie Actions Individual Fellowship (2yr) for project "Sustainable Urban
	Form For Integrated Climate Change Solutions" (SUFFICCS), €175,000
December 2018	Yale Institute for Biospheric Studies, Doctoral Dissertation Improvement Grants, \$5,000
April 2017	Charles Kao Fund Research Grant, for project "Low-carbon Energy Development in 21st
	Century Japan", \$5,000
March 2014	Sole student to win competitive award for one-semester study exchange to Waseda University
	(Japan) as part of Erasmus Mundus MSc in Industrial Ecology
September 2013	Finalist in national competition for best final year project (bachelor thesis project) held by the
	Republic of Ireland Regional Group of the Institution of Structural Engineers
March 2013	Erasmus Mundus Masters in Industrial Ecology (MIND) Category B scholarship award
	(covering tuition, plus stipend totalling €16,000 over two years)
September 2012	National University of Ireland, Galway 'University Scholar', awarded to undergraduate
_	students achieving overall excellence, €500

ACADEMIC SERVICE & SOCIETY MEMBERSHIP

Board Member: International Society for Industrial Ecology, Life Cycle Sustainability Assessment Section (2023-) Member of Scientific Committee: International Conference on Industrial Ecology, Leiden (2023) Society Member: International Society for Industrial Ecology (2016-)

Contributing Author: IPCC Assessment Report 6 Working Group 3, Buildings Chapter (2022) Contributing Author: 'Ten insights from industrial ecology for the circular economy' (ISIE white paper, 2023) Student Representative on Faculty Search Committee: Yale School of the Environment, (2020) Leader of advisory group on reducing air travel GHG emissions from international conferences - International Society for Industrial Ecology (2016-2017)

Academic Referee: Performed peer-reviews of articles submitted to Journal of Industrial Ecology, Environmental Science & Technology, Environmental Research Letters, Joule, Scientific Data, Resources, Conservation & Recycling, Applied Energy, Nature Communications

RESEARCH OUTPUT

Summary (Google Scholar): h-index (13), total citations (824 on Feb 11 2024) Peer-reviewed publications in scientific journals, **as first author**:

- Berrill, P., F. Nachtigall, A. Javaid, N. Milojevic-Dupont, F. Wagner, F. Creutzig. 2024. Comparing urban form influences on travel distance, car ownership, and mode choice. *Transportation Research Part D* 128: 104087
- Berrill, P., E.J.H Wilson, J.L. Reyna, A.D. Fontanini and E.G. Hertwich. 2022. Decarbonization pathways for the residential sector in the United States, 2020-2060. *Nature Climate Change* 12(8): 712-718
- **Berrill, P.** & Hertwich, E. 2021. Material flows and GHG emissions from housing stock evolution in US counties, 2020-2060. *Buildings & Cities* 2(1): 599-617
- Berrill, P., Gillingham, K. T., & Hertwich, E. G. 2021. Drivers of change in U.S. residential energy consumption and greenhouse gas emissions, 1990-2015. *Environmental Research Letters* 16: 034045
- Berrill, P., K.T. Gillingham and E.G. Hertwich. 2021. Influence of housing policy and housing typology on residential energy demand in the United States. *Environmental Science & Technology* 55(4): 2224-2233
- **Berrill, P.**, T.R. Miller, Y. Kondo, and E.G. Hertwich. 2020. Capital in the American carbon, energy, and material footprint. *Journal of Industrial Ecology* 24(3): 589–600.
- **Berrill, P.** and E.G. Hertwich. 2018. Ground truthing the environmental benefits of a polygeneration system: when to combine heat and power? *Energy & Buildings* 173: 221–238.
- Berrill, P., A. Arvesen, Y. Scholz, H.C. Gils, and E.G. Hertwich. 2016. Environmental impacts of high penetration renewable energy scenarios for Europe. *Environmental Research Letters* 10(12): 123002.
- Peer-reviewed publications in scientific journals, as co-author:
- Van Ewijk, S., Chaudhary, S., **Berrill, P**. 2023. Estimating passenger emissions from airfares supports equitable climate action. *Environmental Research Letters*
- Jiang, M., Suo, C., Wu, L., **Berrill, P**. 2022. Consumption structure optimization for reducing energy footprint. *Economic Systems Research*
- Wang, T., Berrill, P., Zimmerman, J. B., Rao, N.D., Min, J., & Hertwich, E. G. 2022. Improved Copper Circularity as a Result of Increased Material Efficiency in the US Housing Stock. *Environmental Science and Technology*, 56(7), 4565-4577
- Pauliuk, S., Heeren, N., Berrill, P., Fishman, T., Nistad, A., Tu, Q., Wolfram, P., & Hertwich, E. G. 2021. Global scenarios of resource and emission savings from material efficiency in residential buildings and cars. *Nature Communications*, 12(1), 5097
- Fishman, T., Heeren, N., Pauliuk, S., **Berrill, P**., Tu, Q., Wolfram, P., & Hertwich, E. G. 2021. A comprehensive set of global scenarios of housing, mobility, and material efficiency for material cycles and energy systems modeling. *Journal of Industrial Ecology*, 25(2), 305–320
- Wang, T., Berrill, P., Zimmerman, J. B., & Hertwich, E. G. 2021. Copper Recycling Flow Model for the United States Economy: Impact of Scrap Quality on Potential Energy Benefit. *Environmental Science and Technology*, 55(8), 5485–5495
- Pauliuk, S., T. Fishman, N. Heeren, **P. Berrill**, Q. Tu, P. Wolfram, and E.G. Hertwich. 2020. Linking service provision to material cycles: A new framework for studying the resource efficiency–climate change (RECC) nexus. *Journal of Industrial Ecology*: 25(2), 260-273

- Miller, T.R., **P. Berrill**, P. Wolfram, R. Wang, Y. Kim, X. Zheng, and E.G. Hertwich. 2019. Method for endogenizing capital in the United States Environmentally-Extended Input-Output model. *Journal of Industrial Ecology* 23(6): 1410–1424.
- Wang, C., X. Zheng, W. Cai, X. Gao, and **P. Berrill**. 2017. Unexpected water impacts of energy-saving measures in the iron and steel sector: Tradeoffs or synergies? *Applied Energy*. 205: 1119-1127

Reports, Book chapters, and theses, as first and co-author:

van Ewijk, S., Ashton, W. S., **Berrill, P.,** Cao, Z., Chertow, M., Chopra, S. S., Fishman, T., Fitzpatrick, C., Heidrich, O., Leipold, S., Ritter, F., Sprecher, B., Yao, Y., & Myers, R. J. (2023). *10 insights from industrial ecology for the circular economy*. https://is4ie.org/whitepaper

Cabeza et al (2022) Chapter 9 Buildings, in IPCC AR6 Climate Change 2022 Mitigation of Climate Change
